Natural Food Certifiers

Nonorganic Ingredient Affidavit

This form should be completed for any nonorganic ingredient used in products label "organic" or "made with organic". Form should be completed and signed by the supplier.
The National Organic Standards (section 205.105) establishes specific requirements are the use of nonorganic ingredients in a processed product labeled as "organic" or "made with organic".
In order to use a nonorganic ingredient in these products, verification must be obtained that the ingredient has been produced without the use of excluded methods (genetically modified organism) ionizing radiation and sewage sludge, and verification that any annotations for the specific ingredient or processing aid noted in section 205.605 or 205.606 has been met.

Ingredient/Substance Name _____ **Manufacturer Name** _____

Please provide the ingredient composition of raw material including processing aids:

Please confirm that the Raw Material meets the following criteria:

The ingredient is produced and handled without the use of ionizing radiation, as described in 21 CFR 179.26: ☐ Yes ☐ No
The ingredient is produced and handled without the use of sewage sludge.: ☐ Yes ☐ No
Ingredients are produced without the use of Excluded Methods, GMO'S, etc: ☐ Yes ☐ No
Excluded methods. A variety of methods used to genetically modify organisms or influence their growth and development by means that are not possible under natural conditions or processes and are not considered compatible with organic production. Such methods include cell fusion, microencapsulation and macroencapsulation, and recombinant DNA technology (including gene deletion, gene doubling, introducing a foreign gene, and changing the positions of genes when achieved by recombinant DNA technology). Such methods do not include the use of traditional breeding, conjugation, fermentation, hybridization, in vitro fertilization, or tissue culture.

Raw Material is an nonorganic agricultural substance. ☐ Yes ☐ No
Raw Material is a nonagricultural substance as defined in §205.2 noted below: ☐ Yes ☐ No
***Nonagricultural substance**. A substance that is not a product of agriculture, such as a mineral or a bacterial culture, that is used as an ingredient in an agricultural product. For the purposes of this part, a nonagricultural ingredient also includes any substance, such as gums, citric acid, or pectin, that is extracted from, isolated from, or a fraction of an agricultural product so that the identity of the agricultural product is unrecognizable in the extract, isolate, or fraction.*

If Raw Material is nonagricultural is it listed on the national list on §205.605? ☐ Yes ☐ No

205.605 Ingredient Annotation. Please check off items that apply to ingredient/substance

Animal enzymes	Rennet - animals derived; Catalase - bovine liver; Animal lipase; Pancreatin; Pepsin; and Trypsin	☐	☐	☐
Enzymes	Derived from edible, nontoxic plants, nonpathogenic fungi, or nonpathogenic bacteria.	☐	☐	☐
Flavors	Nonsynthetic flavors may be used when organic flavors are not commercially available. All flavors must be derived from organic or nonsynthetic sources only and must not be produced using synthetic solvents and carrier systems or any artificial preservative.	☐	☐	☐
Glucono delta-lactone	Production by the oxidation of D-glucose with bromine water is prohibited.	☐	☐	☐
Magnesium sulfate	Nonsynthetic sources only.	☐	☐	☐
Nitrogen	Oil-free grades.	☐	☐	☐
Oxygen	Oil-free grades.	☐	☐	☐
Tartaric acid	Made from grape wine	☐	☐	☐
Waxes	Nonsynthetic (Wood resin).	☐	☐	☐
Yeast	When used as food or a fermentation agent in products labeled as "organic," yeast must be organic if its end use is for human consumption; nonorganic yeast may be used when organic yeast is not commercially available. Growth on petrochemical substrate and sulfite waste liquor is prohibited. For smoked yeast, nonsynthetic smoke flavoring process must be documented.	☐	☐	☐
Acidified sodium chlorite	Acidified with citric acid only.	☐	☐	☐
Activated Charcoal	only from vegetative sources; for use only as a filtering aid	☐	☐	☐
Cellulose	Microcrystalline cellulose is prohibited.	☐	☐	☐

Definitions:

Nonsynthetic (natural). A substance that is derived from mineral, plant, or animal matter and does not undergo a synthetic process as defined in section 6502(21) of the Act (7 U.S.C. 6502(21)). For the purposes of this part, nonsynthetic is used as a synonym for natural as the term is used in the Act.
Synthetic. A substance that is formulated or manufactured by a chemical process or by a process that chemically changes a substance extracted from naturally occurring plant, animal, or mineral sources, except that such term shall not apply to substances created by naturally occurring biological processes.

I declare under penalty of perjury that the above statements are true and correct.
